

NIHR Leicester Biomedical Research Centre in partnership with
The University Hospitals of Leicester NHS Trust and
The University of Leicester

National Institute for
Health Research

The **GENVASC** Study

At the **Heart** of Research

This practice is participating in a **research** study called the GENVASC Study, led by Professor Samani from Glenfield Hospital, whose aim is to improve the prediction of heart and circulatory diseases.

If you are having a NHS health check, your health care professional will ask if you wish to participate in the study and provide more information.

Participation is simple and only involves donating a small sample of blood for research and allowing some information from your medical records to be used confidentially in the research. There are no treatments and no follow-up.

Thank you for considering participating in this important research project.

The GENVASC Study is run by the NIHR Leicester Biomedical Research Centre, Glenfield Hospital, Leicester.
